

Station Design

Station Level Boarding

Similar to the streetcar stations, select Prospect MAX stations will feature level boarding, which includes:

- Curb height equal to the floor of the bus with ramps on each end of the platform.
- Safer, faster boarding for passengers using mobility aids.

Ticket Vending Machines

Select Prospect MAX stations will feature ticket vending machines (TVMs).

- Located at high-boarding locations.
- Purchase tickets before boarding the bus to speed up service.

Technology

Prospect MAX's innovative technologies means faster, more reliable service to enhance the passenger experience.

- Real-time bus arrival information
- Seamless bus/station Wi-Fi
- Traffic Signal Priority (TSP)
- Interactive smart kiosk - similar to streetcar kiosks, with content management training available for designated neighborhood leaders
